

Current situation of food crisis

According to World Bank statistics, international wheat and rice prices have more than doubled in 2007. The World Bank issued a report in April that as of the end of February 2008, the price of wheat in the international price has increased by 181% in the past three years, and the overall price of food has increased by 83%. In the two months from March to April, international rice prices soared by 75%.

What can NGO do for food security?

1. Research and develop the better rice variety to accept to climates.
2. Process and make the added value of rice higher.
3. the thought of seed bank

Food seed bank:
Seed bank used when natural collections can be damaged by natural disasters, outbreaks of disease or war.

The NGO organize or website about Food security

1. Food and Agriculture Organization(FAO)
2. International Rice Research Institute (IRRI)
3. Freerice
4. Faucet plan

1. Food and Agriculture Organization(FAO)

The Food and Agriculture Organization (FAO) is specialized agency of the United Nations that leads international efforts to defeat hunger.

2. International Rice Research Institute (IRRI)

the Institute has provided a home to innovative scientists who had made it their lives' work to reduce poverty through rice research.

3. Freerice

FreeRice.com is a charity website that raises money in English to help improve the global famine. Every time netizens guess the meaning of a new word, the site will donate 10 grains of rice to the UN World Food Programme.

4. Tap project

the UNICEF Tap Project evolved into a successful and innovative campaign that used a mobile app to save lives by providing children with clean water.

Every time netizens guess the meaning of a new word, the website will donate 10 grains of rice to the UN World Food Program.

Example:

Food and Agriculture Organization(FAO) and the International Rice Research Institute(IRRI) have agreed to cooperate more closely to support sustainable rice production in developing countries to improve food security and livelihoods while safeguarding natural resources. An agreement signed today seeks to better pool the scientific knowledge and technical know-how of the two organizations so that they can expand and intensify their work globally.
